VEHICLE COMMAND & CONTROL PLATFORM

PRAETORIAN C2 VEHICLE

COMMON OPERATIONAL PICTURE.
COMMUNICATIONS. MISSION
TOOLS.

OPERATIONAL AWARENESS AT THE VEHICLE EDGE.

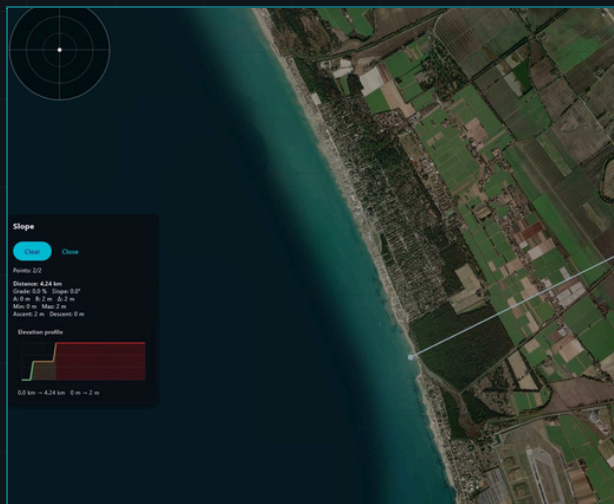

A vehicle-oriented Command & Control platform for
connected operations.

FREE WINDOWS DISTRIBUTION

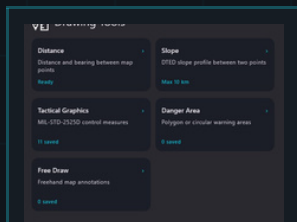

Designed for controlled operational environments.
Deployment, security policies and interoperability must be
validated by the end user before operational use.

01 — OPERATIONAL PICTURE

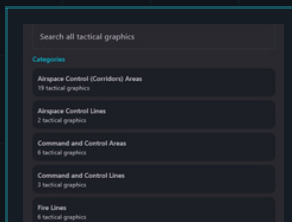

See, plan and coordinate.

- Track operational entities in a unified Common Operational Picture.
- Measure distance, slope and routes directly on the map.
- Use tactical symbology and operational graphics.

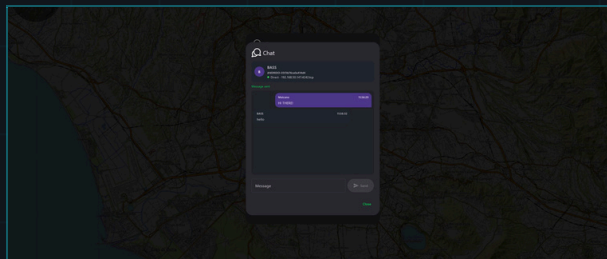

Drawing tools

Tactical graphics

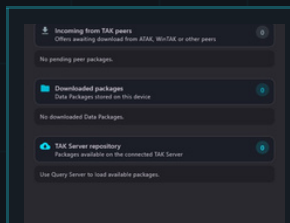

02 — MISSION EXCHANGE

Move information across the team.

Chat & coordination

Exchange messages and coordinate teams directly from the operational environment.

Data packages

Share mission data and operational packages.

Structured messages

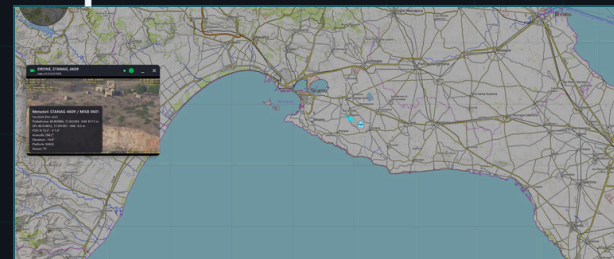

Send standardized operational reports.

NARROWBAND-OPTIMIZED

Bandwidth-aware data exchange reduces unnecessary traffic across constrained tactical networks.

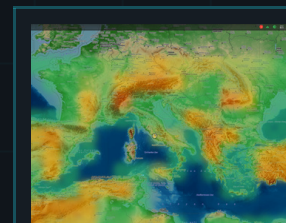

03 — VIDEO & ANALYSIS

Connect the feed to the map.

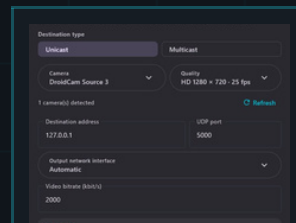

Video integration & STANAG 4609

Display live video, metadata and geospatial information directly on the operational map.

Heatmap

Visualize terrain, coverage and operational data as map overlays.

Streaming Video

Connect and manage live operational video feeds.
